SUMMARY

Computer Science undergraduate (graduating 2026) with active industry experience in data analytics, full-stack development, IoT systems, and AI-powered applications. Currently a Data Analytics Intern at Camerin Health Technologies, building end-to-end analytics pipelines on real-world healthcare and e-commerce data. Combines software engineering with embedded hardware, machine learning, and 2.5+ years of professional communication coaching serving 500+ international learners across 10+ countries.

TECHNICAL SKILLS

Programming Languages: Python, C, JavaScript, SQL, HTML, CSS

Web & Backend: React, Next.js, Node.js, Express.js, REST APIs

Data & Analytics: Power BI, Tableau, Advanced Excel, DAX, Power Query, ETL, Pandas, NumPy

Machine Learning & AI: Scikit-learn, Linear Regression, Logistic Regression, Random Forest, KNN, SVM, K-Means, PCA, Predictive Analytics, OpenCV, LLM API Integration, Prompt Engineering

Databases & Cloud: PostgreSQL, MongoDB, Supabase, Firebase, MQTT

IoT & Embedded: ESP32, Arduino, Embedded C, Sensor Integration, Circuit Design

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Netlify, Render

EXPERIENCE

Data Analytics Intern

May 2026 – Present

Camerin Health Technologies Pvt. Ltd.

Ernakulam, Kerala

- Built end-to-end analytics solutions using Python, SQL, Power BI, Tableau, and Advanced Excel, applying ETL pipelines, DAX, and Power Query to real-world healthcare and e-commerce datasets.
- Developed a Sales Dashboard (Excel), Product Sales Dashboard (Python + Power BI), and a Customer Analytics Dashboard analysing churn and behaviour trends on live banking and e-commerce data.
- Automated data transformation workflows, reducing manual preparation time and improving pipeline reliability across multiple reporting cycles.

Full Stack Developer Intern

May 2025 – June 2025

Rajagiri School of Engineering & Technology

Ernakulam, Kerala

- Built responsive web interfaces using React and Next.js, integrating RESTful APIs with a PostgreSQL backend as part of a 4-person development team.
- Delivered two end-to-end features – user authentication and a dynamic analytics dashboard – within a 6-week sprint cycle.

Robotics Intern

May 2023 – June 2023

Techbyheart

- Programmed ESP32/Arduino microcontrollers for IoT robotic systems, implementing real-time sensor data acquisition and actuation logic.
- Designed and assembled embedded circuits integrating ultrasonic, temperature, and proximity sensors for autonomous navigation features.

Cyber Security Intern

December 2022

Zindot Innovations

- Conducted vulnerability assessments and assisted ethical hacking exercises using industry-standard tools, identifying 5+ simulated network weaknesses.
- Documented threat analysis reports supporting the security audit pipeline and incident response practices.

PROJECTS

Hydrosave+ | ESP32, Arduino, IoT, Linear Regression, React

February 2025

- Developed an AI-driven smart water management system using ESP32/Arduino with water-level, TDS, and flow-rate sensors, achieving real-time monitoring at 1-second intervals.
- Engineered a cloud-connected MQTT to Supabase data pipeline feeding an interactive React dashboard for live analytics and consumption visualisation.
- Implemented a Linear Regression model ($R^2 = 0.91$) forecasting daily household water usage, enabling proactive conservation alerts.

- ASL Sports League Management System** | *Next.js, MongoDB, Node.js, Express.js*

November 2024

 - Built a full-stack sports league platform managing 10+ teams and 50+ fixtures with live score tracking and real-time ranking for an inter-college tournament.
 - Engineered automated fixture scheduling algorithms, reducing administrative setup from hours to minutes.
 - Integrated a fantasy league module driving a 40% increase in user engagement during the tournament period.
- MediMetrics – Patient Health Analytics Dashboard** | *Python, SQL, Power BI, Pandas*

2026

 - Designed a healthcare analytics dashboard integrating patient vitals, appointment history, and treatment outcomes from structured hospital datasets.
 - Built ETL pipelines using Python and SQL to clean and transform raw medical records, reducing data inconsistencies by 35% before loading into Power BI.
 - Developed KPI visualisations for patient readmission rates, treatment duration, and department load, enabling data-driven clinical decision-making.
- CyberSentinel – Network Threat Detection System** | *Python, Scikit-learn, Flask, Random Forest*

2025

 - Built a real-time network intrusion detection system using machine learning to classify normal vs. malicious traffic patterns from network log datasets.
 - Trained Random Forest and Logistic Regression models achieving 94% classification accuracy on benchmark network security datasets.
 - Developed a Flask-based monitoring dashboard displaying live threat alerts, traffic anomalies, and model confidence scores for rapid incident response.
- AI Personal Assistant** | *Python, JavaScript, Generative AI, NLP*

January 2024

 - Built a conversational AI assistant using prompt engineering and LLM API integration for personalised study planning and productivity coaching.
 - Developed an automated roadmap generator breaking long-term learning goals into weekly schedules, adopted by 15+ beta testers.

EDUCATION

Albertian Institute of Science and Technology	Ernakulam, Kerala
<i>B.Tech in Computer Science and Engineering, KTU – CGPA: 7.26</i>	2022 – 2026
Navy Children School, CBSE	Ernakulam, Kerala
<i>Class XII – 85%</i>	2022
Navy Children School, CBSE	Ernakulam, Kerala
<i>Class X – 91%</i>	2020

CERTIFICATIONS

- AI for Cybersecurity** – Udemy, December 2024
- Generative AI and Applications** – Coursera, November 2024
- Core Full Stack Internship Program** – RSET, June 2025

ADDITIONAL EXPERIENCE

Online English Communication Coach	April 2022 – Present
<i>Preply (Apr 2022 – Dec 2024) & BrightSide English (Jan 2025 – Present)</i>	
• Delivered 500+ one-on-one coaching sessions to learners across 10+ countries, maintaining a 4.8/5 rating on Preply. • Designed personalised lesson plans targeting business communication, interview preparation, and professional writing for working professionals. • Built a base of 40+ recurring students through structured feedback, demonstrating strong client management and cross-cultural communication skills.
